I meant pre-1978.
This is an industrial facility.

Gary – what is a post 1978 vintage? The regulation requires facilities to be inspected prior to performing a renovation or demolition. The exclusion pertains to single family homes. The term facility is any institutional, commercial, public, industrial or residential structure, installation or building (including any structure, installation, or building containing condominiums or individual dwelling units operated as a residential cooperative, but excluding residential buildings having four or fewer dwelling units), any ship, and any active or inactive waste disposal site.
I hope that helps.

Elvia:

It has been a long time since I talked with you last. I understand that if you are doing a demo of a building that you must make a notification. If the building is post 1978 vintage, do you still need to do an Asbestos Inspection?
Thanks
